Business Development & Project Management

Welcome back to an exciting autumn!

Are you one of the many who had been looking forward to gathering new momentum at the BSBF2020 in Granada... only to find it has been postponed? Don't despair! We are pleased to announce that we are arranging the Big Science Sweden Conference 2020, on 24 November. At the event, you will have plenty of opportunities for business and networking, including our effective 1-to-1-meetings. [Registration is now open.](#)

Sweden is a Big Science country driving innovation, and we are expanding our activities in Tech Transfer. Our first collaboration programme is with CERN. We will be identifying strategic innovation challenges in companies, and matching them with unique CERN know-how and technology. Learn more at our [Discovery Day on 14 October](#), arranged together with CERN.

We have an interesting programme of virtual events lined up this autumn. One example is the [Focused Technical Workshop on 10 September](#), where the Ångström and Tandem laboratories at Uppsala University will be sharing knowledge about innovative manufacturing methods in complex materials. There will also be an opportunity to book short 1-to-1 meetings with other participants.

Don't miss our informative [Business Corner](#), every Wednesday. A short virtual gathering where you meet our business developers, hear about the latest developments in Big Science, and get the latest news on current procurement opportunities.

We invite you to register for these and other events announced in our Calendar. Join us in driving the Big Science Ecosystem.

BUSINESS CORNER

Don't miss procurement opportunities!

Big Science Sweden holds a Business Corner meeting every Wednesday, 10-10.30. Look for business opportunities and keep up to date with the latest developments in Big Science by joining our virtual weekly gathering. [Read more](#)

Big Science Sweden in partnership with the CERN Knowledge Transfer Group

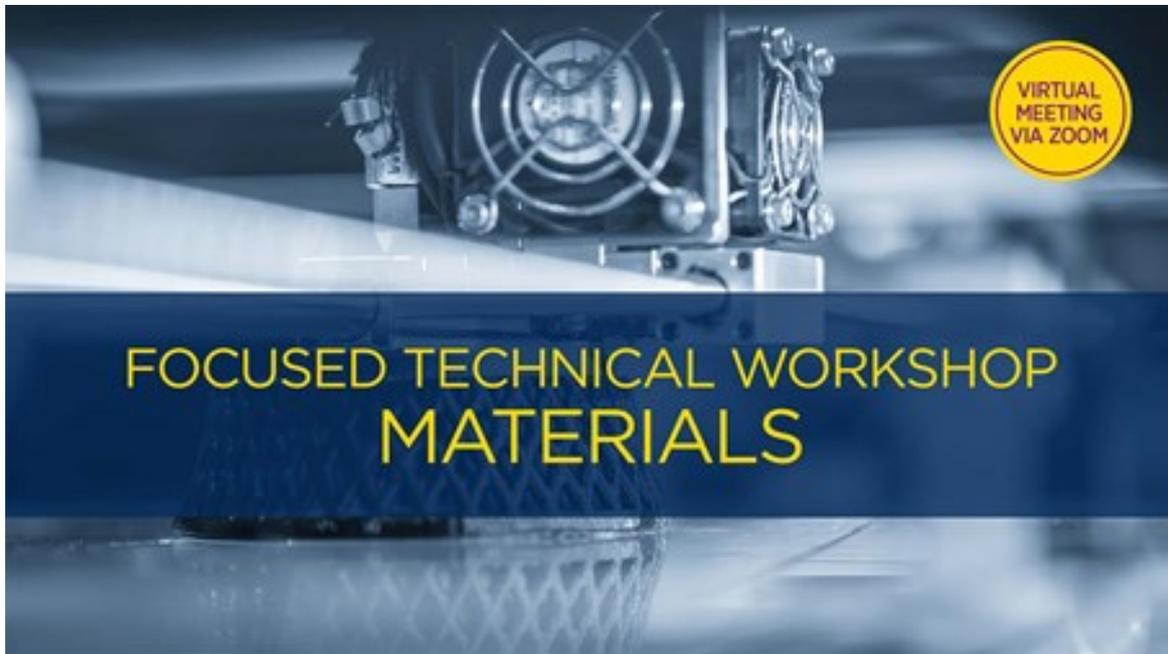

A first collaboration has been initiated with CERN, in which we will identify strategic innovation challenges in companies and match them with unique CERN know-how and technology. [Read more](#)

Examec – small but weekly orders to CERN

Our member company, Examec in Tomelilla, with specialist expertise in advanced machine engineering, sends small but weekly orders to the mechanical workshop at CERN. [Read more](#)

Focused Technical Workshop: Materials

September 10, 2020 • Don't miss this opportunity to learn more about the current state of materials research, and collaboration opportunities, at this Focused Technical Workshop: Materials.

Read all about this exciting event, and register on the [event page](#).

Commercial and industrial possibilities of EPICS

There are great opportunities for industries to integrate and develop industrial automation control systems by using the open source software EPICS. The conference is produced by the EPICS community. [Read more](#)

Additive manufacturing: challenges and opportunities for business models

September 22, 2020 • Additive manufacturing is changing how we design, manufacture, and use both existing and new products. Academic research and industrial development has focused mainly on getting the technology to work and on its application in developing new materials and optimising production processes. [Read more/Register](#)

Partner Event in Lund BigScience@LU 2020

November 5, 2020 • This recurring event focuses on the need for academic input in building and maintaining equipment for Big Science research facilities. [Read more/Registration](#)

Big Science Morning Breakfast meeting for member companies

November 3, 2020 • An opportunity for member companies to meet, share experiences, and learn about how to generate more business in the Big Science market. [Read more/Register](#)

Welcome to Big Science Sweden

A warm welcome to five companies that joined the Big Science Sweden network in summer/autumn 2020.
